

Campingland Surgery Swaffham Patient Survey 2011

Survey was compiled by the PPG in co-operation with Campingland Surgery Practice Manager.

Data relate to the patient survey questionnaire, which was carried out over a one week period in December 2011 by the PPG. The survey polled 10% of the patient group, being typically 600 patients and the graphs show their responses.

The survey was carried out using both postal and one-to-one with patients (with their consent), within the surgery waiting area.

Data inconsistencies relate to incompleting sections and unanswered questions

Target number of patients to be surveyed	600
Postal questionnaires	200
Number returned	95
% of returned questionnaires	47.50%
Surgery questionnaires	400
Number completed	400
% of returned questionnaires	100.00%
Completed surveys	495
Achieved % against target of 600	82.50%
